
Get a blackberry

Posted by Cassie - 2008/03/10 02:35

I know it sounds crazy but I have worked from home for 5 years and during busy times of the month I feel glued to my computer often at the sacrifice of my kids playtime outdoors - I never felt like I could leave if I was waiting for an important e-mail and oftentimes my kids missed out on a trip to the park or beach. My new blackberry has freed me from my computer - I can now check e-mails and respond from anywhere - I wish I had gotten one a long time ago!!! It also has a lot of time saving organizers and reminders too!
